U. S. Department of Agric

Southern California Acclimatizing Association.

For the Introduction and Propagation of Plants.

EL MONTECITO, SANTA BARBARA, CAL., U. S, A.

SEPTEMBER, 1894. PRICE LIST No. 2.

PLEASE READ THIS.

Names printed in CAPITALS are of plants first offered by us in the United States.
* Denotes plants to be grown safely in open ground where the lemon can be grown. ** Plants adapted only to the most sheltered localities of our Coast Region.
PRICE of all plants 25 CENTS apiece except where marked otherwise
Prices by the 10, 50 and 100 quoted on application

PALMS AND CYCADS.

**Acrocomia Havanensis? Cuba ..... $ 1 50
**Areca alba, Mauritius 50
* " Baueri, Norfolk Island ..... 25 to 1 00
** " rubra, Mauritius 50
**Arenga saccharifera, Moluccas 1 00
The "Gomuti" yielding sugar and strong fiber.
*Bacularia (Areca) monostachya, N. S. Wales 1 00
Dwarf slender growing.
**Caryota sobolifera. India 50
*Chamaedorea elegans, Mexico 1 50
One of the best for house decoration.
*Chamaedorea Nec Plus Ultra? Mexico 1 50
Similar in habit to Cocos Weddelliana, but hardier.
Chamaerops excelsa, China ..... 25 to 1 00
The "Chusan Palm," Most hardy of all Palms.
Chamaerops humilis, Medit. Region ..... 25 to 1 00
Cocos australis, Argentina and Uruguay ..... 25 to 50
The most hardy among Cocos.
*Cocos campestris, South Brazil 1 00
* " flexuosa. Brazil 50
Tall growing like the following, but considered hardier.
*Cocos plumosa, Brazil ..... 50 to 5 00
The more extensively planted in Santa Barbara.
**Cocos Weddelliana, Brazil 1 00
Mostly suitable for table decoration.
*Cycas revoluta, China ..... 25 to 5 00
The wellknown and misnamed "sago Palm," not yielding sago and not being a true palm.
Erythea armata, Lower California ..... 25 to 5 00
The "Blue Palm," a very remarkable and hardy species.

Erythea edulis, Guadalupe Island.....25 to 5 00
Growing nearly as fast as Washingtonia filifera, and bearing large bunches of edible fruits when quite young.

**Euterpe edulis, Tropical Brazil..... 1 50

Jubaea spectabilis, Chile.....25 to 5 00
The "Coquito", yielding edible nuts and a large supply of sugar from the old trunks. One of the hardiest palms.

*Kentia (Howea) Belmoreana, Lord Howe's Island..... 25 to 2 00

* " (Hedyscepe) Canterburyana, " .....1.00 to 2 00

* " (Howea) Forsteriana, " .....25 to 2 00
All three most ornamental, suitable also for house decoration.

*Kentia (Clinostigma) Moorei, Lord Howe's Island..... 1 00
A dwarfer but hardier species.

*Livistona (Corypha) australis, Australia.....25 to 2 00
Tall fruiting specimens to be seen in Santa Barbara.

*Livistona Chinensis, South Asia.....25 to 2 00
Commonly known as 'Latania Borbonica."

**Oreodoxa Regia, West Indies,.....25 to 2 00
The "Royal," one of the most majestic of palms.

Phoenix Canariensis, Garden Hybrid.....25 to 5 00
The fastest growing and more commonly planted in Southern California.

Phoenix dactylifera, South Asia and North Africa.....25 to 3 00

PHOENIX JUBAE, Tenerife..... 1 00
The true species native of the Canary Islands.

*Phoenix Leonensis, West Africa..... 50

* " pumila, South Asia..... 50

* " Natalensis, South Africa..... 50

* " reclinata, South Africa..... 25 to 50

* " rupicola, India 50
The most graceful of Phœnix.

**Pinanga Kuhli, Java..... 1 50

**Pritchardia Pacifica, South Sea Islands..... 50
One of the most remarkable fan palms,

*Ptychosperma Alexandrae, Queensland.....25 to 2 00
Not unlike Seaforthia, but growing stouter and taller.

*Sabal Palmetto, Georgia and Florida.....

*Seaforthia elegans, Australia.....25 to 2 50
One of the most elegant and more freely growing. Our plants are raised from seed ripened in Santa Barbara.

*Serenoa serrulata, Florida.....

**Thrinax argentea.....
One of the most elegant fan palms, the underneath of the leaves shining like satin.

**Wallichia disticha, India..... 1 00

Washingtonia filifera, California.....25 to 1 00

*WASHINGTONIA SONORAE, Sonora..... 1 00
Recently discovered in Lower California and in Sonora, attaining larger proportions than the preceding.

*ZAMIA ANGUSTIFOLIA, Bahamas..... 1 00
Native name "Bay Rush," a miniature Cycas Revoluta in appearance. Stem yielding excellent starch.

*Zamia integrifolia, Florida.....25 to 1 00
Native name "Coontie," dwarf growing like the preceding.

DECORATIVE PLANTS.

*Agave CORDEROYI, Mexico 50

* " dealbata, " 50

* " DECIPIENS, Florida .....

Tall growing deep green.

*Agave geminiflora, Mexico 50

* " horrida, " .....

* " MARMORATA, " 50

* " mitraeformis " 50

* " Palmeri, New Mexico .....

* " rigida, Yucatan .....

* " " Var Sisalana, Yucatan .....

Now extensively planted in Florida and the Bahamas, yielding a most superior fiber known as Sisal Hemp.

*Agave schidigera, Mexico 50

* " Shawii, Lower California ..... 25 to 1 00

* " stricta, Mexico ..... 25 to 1 00

* " Victoriae Reginae, Mexico ..... 1.00 to 2 00

One of the most remarkable of dwarf growing Agaves.

*Aloe fruticosa, South Africa ..... 25 to 1 00

One of our best plants for winter blooming. Huge panicles of scarlet flowers.

*ALOE HANBURYANA, South Africa .....

Not less decorative; broad spathulate whitish leaves; corymbs of large orange flowers all winter.

*Aralia papyrifera, Formosa ..... 25 to 1 00

The Ricepaper plant; decorative either for its immense leaves or its enormous inflorescences

*BAMBUSA ARUNDINACEA, India .....

One of thorny Bamboos; attaining fifty feet and more, and several inches in diameter; will prove exceedingly useful for hedges and windbreaks, as well as for industrial purposes.

Bambusa aurea, North China ..... 25 to 1 00

Attaining about 12 feet; canes bright yellow.

Bambusa nigra, North China ..... 25 to 1 00

15 to 20 feet high; canes ebony black when fully ripened.

Bambusa viridi-glaucescens, North China ..... 25 to 1 00

A most vigorous and spreading grower, attaining 40 feet and over in good conditions, with canes one inch thick This and the two preceding will stand several degrees of frost.

*DASYLIRION (NOLINA) BELDINGI, Lower California 1 00

Lately discovered by Mr. T. S. Brandegee on mountains above Cape St. Lucas. Arborescent; similar in habit to D. longifolium, but with glaucescent leaves.

*DASYLIRION BIGELOWI, Arizona .....

Arborescent; tip of leaves curiously twisted, and most hygrometrical.

Dasylirion glaucum, Mexico .....

Low growing; spiny glaucous leaves.

Dasylirion gracile .....

Arborescent; leaves spiny, bright green, ending in sort of spreading brush of filaments, like the preceding

Dasylirion longifolium, Mexico ..... 25 to 50

Eight to ten feet high and more; leaves loriform, drooping, several feet long, bright green, not spiny.

*Dasylirion quadrangulare (junceum), Mexico .....

Stem short; leaves six and more feet long; quadrangular, like those of a rush .

Dasylirion Wheeleri, Arizona . . . . . .

Dwarf; leaves glaucous, spiny, spirally contoretd.

All Dasylirions are highly ornamental plants, much used in South European gardens, fast growers, will stand any amount of drought and heat, as well as several degrees of frost.

*Doryanthes Palmeri, Queensland . . . . . .

One of the Australian "Torch Lilies," leaves six feet long, broad, light green. spikes of flowers bright scarlet.

*Dracaena Draco, Canary Islands . . . . . 25 to 50

The Dragon Tree celebrated for the one at Orotava, estimated by Humboldt to be 6 thousand years old.

*FOURCROYA ALTISSIMA, Mexico 50

" Bedinghausii, " . . . . . 25 to 2 00

* " ELEGANS, " 50

* " gigantea, " . . . . . .

* " LONGAEVA, Guatemala . . . . . .

* " PUBESCENS, Mexico 50

Besides being used as decorative plants all Fourcroyas are available for the fiber they yield.

GYMNOTHRIX LATIFOLIA, Uruguay . . . . . .

Broad leaved, tall growing grass, available also for fodder.

*Musa Ensete, Abyssinia . . . . . 25 to 1 00

*PANDANUS FURCATUS, Assam 2 00

Likely to prove the most hardy of all screw pines, growing up to 4,000 feet.

**Pandanus utilis, Madagascar 2 00

Mostly adapted for house decoration.

PANICUM SPECTABILE GIGANTEUM, C. Africa . . . . . .

Tall, available for fodder, and ornamental also for its conspicuous inflorescences.

**Ravenala Madagascariensis, Madagascar . . . . . 2 50 to 5 00

The far-famed traveller's tree.

Yucca AUSTRALIS, N. Mexico 1 00

Tall, arborescent.

Yucca baccata, S. California . . . . . .

Bearing pulpy, edible fruits.

Yucca filamentosa, Carolina southwards . . . . . .

" FILIFERA, N. Mexico 1 00

One of the tallest yuccas; immense, drooping panicles of white flowers.

YUCCA RUPICOLA, West.Texas 1 00

" Whipplei, S. California . . . . . 25 to 1 00

" WHIPPLEI GRAMINIFOLIA . . . . . .

One of the most recommendable either for its dense rosette of glaucous leaves, or for the panicle of fragrant white flowers, sometimes over 20 feet high. The variety has longer pendulous leaves and purplish flowers.

Tropical and Subtropical Fruit Bearing or Economic Plants.

Aberia Caffra, S. Africa 50

The Kai-Apple, spiny, available for hedges.

*Achras Sapota, West Indies . . . . . 50 to 1 00

The Sapodilla, or naseberry.

**Adansonia digitata, C. Africa 1 00

The well-known Baobab; fruit containing large percentage of Tartaric Acid.

*ALEURITES CORDATA, East Asia 1 00

The Chinese varnish tree.

*Amomum Cardamomum, Ceylon . . . . . .

The Cardamom.

*Anona Beriba? Trop. Brazil 50

Said to bear fruit of most superior quality.

*Anona Cherimolia, Central and S. America ..... 25 to 1 00
The Cherimoya, of all Anonas the only one grown to a certain extent in California, where it is sure to become an important article of export.

**Anona muricata, W. Indies 50
The sour sop: large green fruit.

**Anona squamosa, Trop. America 50
The sweet sop, or sugar apple. Fruit conical, yellowish.

*ANONA SUAVISSIMA; Brazil 1 00
Said to bear delicious fruits.

**Artocarpus integrifolia, India 1 50
The Jack fruit; attaining 50 pounds weight.

**Averrhoa Carambola, India 1 00
Yielding a pleasant acid refreshing fruit.

BENTHAMIA FRAGIFERA, Himalaya .....
Fruit in appearance and size like the largest strawberries.

**Bromelia Ananas, All Tropical Countries ..... 50 to 2 00
The Pine apple; detailed list of varieties on application.

*Calodendron Capense, Natal 1 00
The Cape Chestnut, most prized also for its flowers.

Capparis spinosa, Medit. Region .....
Yielding the well-known capers.

**CAPSICUM FRUTESCENS. Trop. America .....
The Cayenne or tree pepper; from its fruits the celebrated Tabasco Sauce is manufactured.

**CARICA ATROVIOLACEA ELEGANTISSIMA, S. America, 1 00
Fruits of a violet color.

**Carica Papaya, Central America 1 00
The Papaw, now grown in all warm countries.

*CARICA QUERCIFOLIA, Argentina and Paraguay 1 00
Fruit small, but leaves possessing digestive power to higher degree than other kinds

Carissa Arduina, S. Africa .....
" grandiflora, " .....
Both spiny evergreen, with white fragrant flowers, berries size of a small plum.

*CASIMIROA EDULIS, Mexico ..... 50 to 1 00
The "Zapote Blanco," much prized in its native country. A large tree over 70 years old is to be seen in Santa Barbara.

*CASTANOSPERMUM AUSTRALE, Queensland 1 00
The "Moreton Bay Chestnut," equally conspicuous for its rich foliage, saffron colored flowers and globular seeds larger than any Italian chestnut.

*Cedrela odorata, W. Indies ..... 25 to 50
The "Cedro" of Cuba, yielding reddish fragrant wood.

*Ceratonia Siliqua longissima, Medit Region .....
Longer podded variety of the well-known "St. John's Bread."

**Cicca disticha, India 50
Most elegant tree; white round berries in bunches, tasting like gooseberries.

Cinnamomum Camphora, China and Japan ..... 25 to 1 00
The well known Camphor tree, growing to perfection in California.

**Coccoloba uvifera, W. Indies 50
The "Seaside Grape;" broad foliage; dark blue berries

*Coffea Arabica, Harrar ..... 50 to 1 00
Common Coffee; exceedingly ornamental, too, for its shining leaves, white, fragrant flowers and red berries.

*CUPANIA ANACARDIOIDES, East Australia 1 00
Beautiful evergreen; fruit edible.

*Cyphomandra betacea, S. America .....
The tree tomato; drooping, orange colored, egg shaped berries.

Eriobothrya Japonica, China and Japan ..... 25 to 50
The well-known "Loquat."

*Eugenia Brasiliensis, Brazil 50
The "Grumichama" of Rio Janeiro:

*Eugenia Jambos, India 50
The "Rose-Apple" fruits large, rose scented.

*EUGENIA PITÂNGA, Brazil 1 00
Scarlet berries size of a cherry.

*Ficus elastica, Assam ..... 50 to 1 00
The true "Rubber Tree," so much used for house decoration.

*Ficus glomerata, India ..... 50 to 1 00
Fruits in clusters, edible.

*Ficus Indica, India ..... 50 to 1 00
The true "Banyan Tree."

*GOURLIAEA CHILENSIS, Chile 1 50
The "Chañar;" good, edible fruits.

*HYMENAEA COURBARIL, Indies 1 00
A lofty tree, yielding the "Gum Animi."

*Inga Dulcis, Central America ..... 25 to 50
Pods containing very pleasant pulp,

*LITHRAEA MOLLE, Chile 1 00
Fermented fruits supply much prized "Chicha," or brandy.

*Macadamia ternifolia, Queenland 1 00
Beautiful evergreen; nuts of delicate taste:

**Mangifera Indica, India ..... 50 to 1 00
The "Mango,' one of the choicest tropical fruits

*Maranta arundinacea, Trop. America .....
Supplying the arrowroot of commerce.

*Mimusops Elengi, India 50
Flowers used in perfumery; fruits edible.

**MYRISTICA VERRUCOSA, Trop. Asia 1 50
Closely allied to the "nutmeg."

*Musa Sinensis and others, All over the tropics ..... 25 to 2 00
The "banana;" detailed list of varieties mailed on application.

Opuntia Ficus Indica, and others, Mexico .....
The "prickly pear:" detailed list of varieties mailed on application,

Passiflora edulis, Central and S. America .....
The most freely growing of "Grenadillas" with edible fruit.

**QUASSIA AMARA, Surinam 1 50
The "Bitter cup:" flowers also very showy.

*Persea gratissima, Mexico ..... 25 to 1 00
The well-known "Ahuacate," or "Alligator pear."

Pinus Pinea, Italy .....
The Italian umbrella or stone Pine.

Pistacia vera, Asia Minor .....
The most delicious "Pistachio nut"

*Psidium cattleyanum, Brazil .....
The "strawberry guava," extensively planted in California.

*Psidium guava, Central and Southern America .....
A choice variety of the so-called "lemon guava."

**Santalum album, India 1 50
Yielding the fragrant "sandal wood" of commerce.

*Sapindus saponaria, Central America 1 00
Fruits and roots used in place of soap.

*Syzygium (Eugenia) Jambolanum, S. Asia 50
The "Jambolan plum,' a very free grower with us.

**Tamarindus Indica, India 50
The "Tamarind" a splendid shade tree; pods full of pleasant subacid pulp.

*Zingiber officinale, India .....
Root yielding the true ginger of commerce.

WINTER AND EARLY SPRING FLOWERING PLANTS.

N. B.—We are devoting special attention to enlarge the altogether limited number of woody plants which, while blooming freely in the open in our climate, are likely to become popular for growing under glass in less favored locations.

*Acacia armata, Temp. Australia.....
* " dealbata " .....
* " cultriformis " .....
* " Farnesiana, All extra trop. countries.....
* " pycnantha, temp. Australia.....
*ACACIA RICEANA, " 50

All six acknowledged to be the very best for winter blooming and for cut flowers.

ANTHYLLIS BARBA JOVIS, Medit. region.....

Grown in gardens since the time of Pliny, for its silvery persistent foliage and straw-colored flowers.

*CAESALPINIA SEPIARIA, India .....

Bright green glossy leaves, flowers yellow.

CALYCOTOME SPINOSA, S. Europe.....

A formidably armed shrub, bearing a profusion of sulphur colored fragrant flowers.

*CASSIA CORYMBOSA, River Plate.....

Cassia tomentosa, Mexico .....

The first with glossy, the second with woolly leaves, both covered nearly all the year round with bright yellow flowers.

*Chilopsis saligna, Arizona and neighboring regions.....

Called the "desert or flowering willow," and "mimbres" in Mexico; a small tree similar in foliage to a willow, in its purplish flowers to a catalpa.

CYTISUS ADAMI, Europe..... 50

Garden hybrid between C. purpureus and the common "laburnum," bearing huge bunches of flowers like the last, but sometimes yellow, sometimes purple.

CYTISUS AEOLICUS, Æolian Islands..... 50

Distinct foliage, flowers bright yellow.

CYTISUS CAPITATUS, S. Europe.....

Yellow flowers in globose heads.

*CYTISUS PALMENSIS, Canary Islands..... 50

All through winter and spring covered with thousands of pure white, deliciously fragrant flowers; excellent for pot growing, as well as for cutting.

Cytisus scoparius Andreanus, Europe..... 50

A sport of the so-called English or Scotch broom; flowers large, red and yellow (known also as "Genista Andreana).

EDWARDSIA CHILENSIS, Chile.....

Small tree; deep green foliage; flowers large, pea-shaped, golden yellow.

GENISTA ÆTHNENSIS, Sicily.....
" FLORIDA, S. Europe.....
* " LINIFOLIA, S. Spain.....
" MADERENSIS, Madera..... 50

All these with differently shaded yellow flowers; the first hardy in Paris and at Kew.

*GENISTA (Retama) MONOSPERMA, Sicily..... 50

Stems glaucous prostrate; flowers large, white with crimson center deliciously fragrant.

GENISTA VIRGATA, S. Spain..... 50

Considered to be one of the very best of the yellow flowered kinds.

GLOBULARIA ALYPUM, Greece..... 50

A low shrub, covered all winter with globose heads of bright blue flowers, keeping well in water.

LABURNUM VULGARE PARKSII, England.....

An improved variety of the common laburnum.

Lonicera tatarica pulcherrima, Central Asia.....

An improved form of the very well known type.

*MEDICAGO ARBOREA, Greece.....

The "tree alfalfa," making good sized trunks; bright green foliage; flowers orange yellow; wood is black and so hard that it was called "ebony" by the ancient Greeks.

*MELIA SEMPERFLORENS, ? 50

Quite dwarf species or form, with feathery foliage, bearing its pretty panicles of blue fragrant flowers nearly all the year round.

*PHLOMIS FRUTICOSA, Greece.....

Not unlike the so-called "lion's tail" in habit, with golden yellow whorls of flowers all winter

*PIPTANTHUS NEPALENSIS, Nepaul..... 50

Broad glossy leaves; pea-shaped, large yellow flowers.

*POLYGONUM ELEGANS, S. Italy .....

Fine hairy stems in clumps, bearing countless minute pinkish white flowers, much adapted for pot culture.

*Poinsettia pulcherrima, Mexico.....

This well-known gorgeous plant will grow to perfection here. Heads attaining at times two feet in diameter.

Robinia hispida, Carolina..... 50

A most elegant plant when in bloom.

SOLANUM UMBELLIFERUM, S. California.....

Shrubby; flowers large. blue and delicately fragrant all through the winter.

*SOPHORA SECUNDIFLORA, Texas and Mexico.....

A moderately sized tree with blue fragrant flowers in spikes; seeds bright scarlet.

Spartium junceum, S. Europe.....

The "Spanish" or "Italian broom," here blooming all the year round.

Xanthoceras sorbifolia, N. China.....

One of the prettiest early flowering deciduous shrubs; stands many degrees of frost.

CLIMBERS

*Antigonum leptopus .....25 to 50

The "Rosa de Montana" and "San Miguelito", covered in summer and autumn with a mantle of bright pink flowers.

*Aristolochia elegans, S. America..... 50

A neat growing species with curious, good-sized flowers, free of any bad smell.

*BIGNONIA CHRYSANTA, S. America..... 50

* " Manglesii, Australia .....
* " speciosa, River Plate .....
* " Tweediana, " .....
* " TWHAITESI, Ceylon..... 50
* " venusta, Brazil .....

Second with cream-colored flowers in early spring; third large lilac flowers; sixth with bright orange flowers in winter; the remaining with yellow flowers of different shades.

*BRUGMANSIA SARMENTOSA, C. America..... 50

Known also as "Solandra grandiflora;" a glorious climber, white, fragrant, with trumpet shaped flowers larger than Daturas.

CAMPSIDIUM VALDIVIANUM, Chile.....

The true species (plant sold under this name in California are "Bignonia Manglesii;)

*Cereus Macdonaldiæ, S. America.....

Unquestionably the best of night blooming Cereus; flowers immense, buff colored, vanilla scented

*CISSUS INCISA, S. Texas and Mexico . . . . . .
"Yerba del Buey;' a most tropical looking vine.

*CLEMATIS DRUMMONDI, S. Texas and Mexico . . . . . .
White flowered, with silky plumose tails 4 inches long.

*Clitoria ternatea, S. Asia . . . . . .
Pea shaped flowers of the brightest sky blue.

CLITORIA BLUTHIERII, Central America . . . . . .
Flowers bright yellow.

*CRYPTOSTEGIA GRANDIFLORA, Central America 50
Large, white fragrant, funnel-shaped flowers.

CUCUMIS ECHINOPHORUS, S. Africa . . . . . .
A vigorous grower with ornamental fruits.

Gelsemium sempervirens, From Virginia southwards . . . . . .
" " Fl. Pl., Virginia 50
The "Virginia" or "Carolina jessamine," single and double: flowers bright yellow, deliciously fragrant.

Hedera helix chrysocarpa, S. Europe . . . . . .
The common "ivy," with golden colored berries.

JASMINUM HUMILE, Himalaya . . . . . .
Trailing, dark green, yellow flowers.

*IBATIA MURICATA, Central America . . . . . 25 to 50
White fragrant flowers.

Lathyrus splendens, S. California . . . . . .
Well named "The Pride of California," being indeed one of the most gorgeous climbing plants.

Mandevillea suaveolens, Chile . . . . . .
The well-known "Chilian jessamine."

*Passiflora manicata, Central America . . . . . .
The scarlet passion flower, growing so freely in Santa Barbara.

PITHECOCTENIUM MURICATUM, Mexico . . . . . .
A most vigorous climber, with bignonia like, whitish and yellow flowers.

PITHECOCTENIUM CLEMATIDEUM, River Plate . . . . . .
Pure white flowers.

Pueraria thunbergiana, Japan . . . . . .
One of the most vigorous climbers, with immense trifoliolate leaves. Stands winter in Philadelphia.

Solanum jasminoides grandiflorum, gard. var. . . . . .
A remarkable improvement on the original type.

* Seaforthianum, West Indies . . . . . .
More herbaceous looking; blue flowers, red berries

* Wendlandi, Guatemala . . . . . 25 to 50
A truly magnificent climber, to be grown mixed with others, being deciduous in winter with us.

*Tacsonia Van Volxemi, Columbia . . . . . .
Long stemmed, drooping flowers of the richest crimson.

* JAMESONI, Ecuador . . . . . .
Flowers salmon colored.

Tecoma capensis, S. Africa . . . . . .
The well-known scarlet species, growing so freely in California.

* jasminoides, alba magna, Australia 50
A pure white larger flowered variety of the well-known type

Mackenni, S. Africa . . . . . .
An exceedingly vigorous climber, bearing large, pinkish flowers in huge bunches.

MISCELLANEOUS TREES AND SHRUBS.

*ABROMA AUGUSTA, India 50
A majestic foliage plant, nearly related to Theobroma cacao.

*ABUTILON LONGICUSPE, Abyssinia 50

**AGLAIA ODORATA, S. Asia 2 00

ACACIA FLEXICAULIS, S. Texas and Mexico 50
Tall growing: shining leaves; flowers yellow fragrant; dark red seeds used as a substitute for coffee.

*BAUHINIA DIPHYLLA, India 50

*BAUHINIA MONTANA, Himalaya 50

**CALOPHYLLUM CALABA, W. Indies 1 00
The "Santa Maria;" beautiful evergreen tree; white fragrant flower.

*CASSIA CANCHA, Tropics .....
* " LAEVIGATA, Tropics .....
* " SCHINIFOLIA, " .....
* " TOROSA, " .....

Cedrela Sinensis, China 50
A most ornamental deciduous tree; hardy at Philadelphia.

*CELTIS SINENSIS, India and China .....
A beautiful shade tree, with dark green coriaceous leaves and dull red berries.

CONVOLVULUS OLEOIDES, Greece .....
Shrubby, not climbing, covered with thousands of light pink flowers in summer.

*DRIMOSTACHYS NUTANS, Nubia and Abyssinia 50

*DUVAUA DEPENDENS, Chile .....
A pretty aromatic evergreen tree, with white flowers.

Eleagnus Simoni, China .....

*ENTEROLOBIUM CYCLOCARPUM, W. Indies .....
A beautiful tree with glaucous finely cut foliage.

*EHRETIA ELLIPTICA, S. Texas and Mexico .....
The "Anagua," a beautiful small tree, with pretty white flowers.

*ERYTHRINA BOGOTENSIS, Columbia 50
* " INSIGNIS, S. America .....25 to 50
* " VIARUM, " " .....20 to 50
All these "coral trees" grow to a large size, and are conspicuous for their scarlet flowers.

*EUCALYPTUS CITRIODORA, Australia .....
* " PUNCTATA, " .....

**Ficus aurea, Florida .....
" australis, Australia .....25 to 50
" macrophylla, " .....25 to 50

Grevillea robusta pyramidalis, Australia .....

HALIMODENDRON ARGENTEUM, Siberia .....
A prickly, glaucous shrub, with pretty pea shaped pink flowers in summer, will stand any amount of cold and of drought too, and will thrive also in saline or alkaline soils.

*HIBISCUS CRASSINERVIS, Abyssinia 50
Dwarf growing with pretty vermilion colored flowers.

*JACARANDA MIMOSAEFOLIA FLORE ALBO, S. America, 25 to 50
White form of the well known type.

*Jacquinia armillaris, Florida and W. Indies .....
A pretty evergreen with white fragrant flowers.

JUNIPERUS PHOENICEA, Mediterranean Region.....

Arborescent will stand heavy sea-winds better than any other conifer.

JUNIPERUS PROCERA, Abyssinia 50

A large tree, growing much in the shape of the cedar of Lebanon.

*Leucadendron Argenteum, Cape of Good Hope.....50 to 2 00

The much admired "Silver tree" growing so freely with us.

LEUCAENA GLAUCA, from Texas Southwards.....

A pretty small tree related to "Acacias" with white flowers.

*MICHELIA CHAMPACA, India..... 2 50

A stately tree, planted near the pagodas on account of its beautiful foliage, and of its sweetly fragrant flowers.

Michelia (Magnolia) fuscata, China.....50 to 1 00

The so called banana shrub; flowers deliciously fragrant.

MIMOSA ACANTHOCARPA, S. America.....

" DENHARDTI " " .....

" SPEGAZZINI, River Plate.....

All three with finely cut leaves and pink flowers.

Parkinsonia aculeata, from Texas southwards ....

The "Retama" a tree with light foliage and beautiful yellow flowers, in appearance like some "Oncidiums."

PITHECOLOBIUM BREVIFOLIUM, S. Texas and Mexico.....

The "Huajillo," a beautiful evergreen tree much prized also for fodder.

Pittosporum nigricans, N. Zealand.....

**PLUMIERIA ACUMINATA, India..... ..... 1 00

** " HYPOLEUCA, " 1 00

Two of the so called "Frangipaniers," with deliciously scented flowers.

SAPINDUS MARGINATA, Texas... 50

The "Soapberry;" a moderate sized tree, with large panicles of white flowers.

Tecoma grandiflora, China and Japan ....

* " SERRULATA, S. America.....

* " stans, from Texas Southwards..... .....

* " velutina, India.....

The first with orange, the rest with yellow flowers.

*Thevetia Neriifolia, W. Indies..... .....25 to 50

A shrub with linear shining leaves, large fragrant canary yellow flowers.

PERENNIALS.

ACHYROPHORUS BRASILIENSIS, Ecuador.....

ALCEA SIDAEFOLIA, Dalmatia.....

Large lemon colored flowers all the year.
